

Under the Moon was an idea conceived by mothers who searched high and low to find the ideal baby products for themselves and their children. We know from experience there is nothing more frustrating than purchasing something and finding it poor quality, useless or worst of all ... dangerous ! This is why we have great faith in the products created for mothers, by mothers who were unable to find exactly what they desired without making it themselves. Part of the vision of this catalogue is to inspire mothers to have faith in their creative ideas and to put them into action. We want women to have confidence that their contributions can make a difference in the world, and to go for it ! By supporting Under the Moon, you are supporting mothers and children everywhere who desire a healthy, happy world. Thank you for your contributions to our passion project !
